

Professional Summary

Junior Software Developer with 2+ years of professional experience building responsive, accessible, and modern web interfaces using HTML5, CSS3, JavaScript, Bootstrap 5, Tailwind CSS 4, Figma and React.js. Experienced in developing websites and web applications across education, accessibility, corporate, entertainment, and sports domains. Creator of Xira CSS Framework, an intent-based CSS framework featuring intrinsic responsive layouts, reusable UI components, design tokens, selective CSS compilation, and native-first accessibility. Strong focus on responsive UI development, reusable components, accessibility, performance, and maintainable front-end architecture.

Experience

MVG Digital Private Limited

Jan 2025 – Sep 2026

Junior Software Developer

Chennai, Tamil Nadu

- Develop responsive and modern web interfaces using HTML5, CSS3, JavaScript, Bootstrap 5, Tailwind CSS, and React.js.
- Build reusable UI components and responsive layouts while maintaining consistency across desktop, tablet, and mobile devices.
- Collaborate with design and development teams to translate project requirements and designs into functional, user-friendly web interfaces.
- Implement interactive web components, forms, navigation, animations, and responsive layouts based on project requirements.
- Work on multiple client projects across education, accessibility, corporate, entertainment, and sports domains.
- Contribute to accessibility-focused web development by implementing semantic HTML and user-friendly interfaces for diverse users.

Skifter Technology

Apr 2024 – Nov 2024

MERN Stack Developer Intern

Chennai, Tamil Nadu

- Develop full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Build responsive and reusable React.js components and integrate RESTful APIs for dynamic web applications.
- Develop backend APIs using Node.js and Express.js with MongoDB for data storage and management.
- Implement CRUD operations, form validation, authentication, and frontend-backend integration.
- Collaborate with the development team to debug issues, improve application functionality, and deliver project requirements.

Novi Tech

Oct 2023 – Mar 2024

MERN Stack Developer Intern

Coimbatore, Tamil Nadu

- Develop web applications using the MERN stack, including MongoDB, Express.js, React.js, and Node.js.
- Create responsive user interfaces using React.js, JavaScript, HTML5, CSS3, and modern UI practices.
- Integrate frontend applications with REST APIs and implement dynamic data-driven features.
- Work with MongoDB for database operations, including creating, retrieving, updating, and managing application data.
- Participate in debugging, testing, and improving application performance and user experience.

Xira CSS Framework – Creator Developer

Xira CSS Framework – Open-Source CSS Framework | CSS, JavaScript, Node.js, PostCSS, NPM

- Designed and developed Xira, an intent-based CSS framework focused on intrinsic responsive layouts, reusable UI components, design tokens, and native-first accessibility without utility-class proliferation.
- Built a dependency-aware selective CSS compiler that scans application source, resolves framework APIs and dependencies, and generates production CSS containing only the required Xira styles.
- Developed reusable layout primitives and UI components including Grid, Stack, Cluster, Bento, Sidebar, Navbar, Dialog, Accordion, Forms, Cards, Tabs, and more, with built-in theming and responsive behavior.

- Built an NPM-based CLI workflow with `init`, `build`, `dev`, and `analyze` commands for integrating and optimizing Xira in real-world projects.
- Validated the framework across Chromium, Firefox, and WebKit with 900+ automated tests covering accessibility, responsive behavior, component interactions, and compiler correctness.
- Built a complete SaaS reference website using Xira, achieving a measured 77.2% reduction in raw framework CSS through selective compilation.

Projects

National Association for the Blind (NAB) | *HTML5, CSS3, Bootstrap 5, JavaScript*

- Developed the front-end of an accessibility-focused website for the National Association for the Blind (NAB).
- Implemented responsive and user-friendly interfaces with accessibility considerations for users with visual impairments.
- Built semantic HTML structures, responsive layouts, navigation, forms, and interactive UI components.
- **Website URL:** nabtamilnadu.org

Avatar Human Capital Trust (AHCT) | *WordPress, HTML5, CSS3, JavaScript*

- Developed and maintained the organizational website using WordPress.
- Customized responsive page layouts, content sections, and user interface components based on project requirements.
- Implemented front-end enhancements and supported ongoing website content and page updates.
- **Website URL:** ahct.org.in

The Madras Seva Sadan School – Alumni Portal | *HTML5, CSS3, Bootstrap 5, JavaScript*

- Developed the front-end of an alumni portal for The Madras Seva Sadan School.
- Created responsive layouts, reusable UI components, forms, navigation, and interactive elements using Bootstrap 5.
- Ensured consistent and responsive user interfaces across desktop, tablet, and mobile devices.
- **Website URL:** alumni.themadrassevasadan.org

Sir M Lady School – Website | *HTML5, CSS3, Tailwind CSS 4, JavaScript*

- Developed a modern and responsive school website using Tailwind CSS 4.
- Built reusable utility-based UI components and responsive layouts following modern web design practices.
- Implemented responsive navigation, content sections, interactive elements, and cross-device layouts.
- **Website URL:** sirmladyschool.edu.in

Imayah Live – Class Management Web Application | *HTML5, CSS3, Bootstrap 5, JavaScript*

- Contributed to the front-end development of Imayah Live, a web-based class management application.
- Developed responsive interfaces, forms, navigation, reusable UI components, and interactive application modules.
- Worked on front-end implementation to support education-related workflows and provide a consistent user experience.
- **Website URL:** live.imayahtech.com

Project Puthri | *WordPress, HTML5, CSS3, JavaScript*

- Developed and maintained the organizational website using WordPress.
- Customized responsive page layouts, content sections, and user interface components based on project requirements.
- Implemented front-end enhancements and supported ongoing website content and page updates.
- **Website URL:** www.puthri.org

Sir Mutha Venkatasubba Rao Concert Hall (SMVRCH) | *HTML5, CSS3, Tailwind CSS, JavaScript*

- Developed the front-end of the website for Sir Mutha Venkatasubba Rao Concert Hall (SMVRCH).
- Created modern and responsive layouts using Tailwind CSS with reusable UI components.
- Implemented responsive navigation, content sections, interactive elements, and visually engaging web interfaces.
- **Website URL:** smvrch.com

RedBox – Mobile E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack e-commerce platform for selling new and second-hand mobile phones, mobile accessories, and repair services.

- Built responsive and reusable user interfaces using React.js, JavaScript, HTML5, CSS3, and modern UI practices.
- Developed Node.js and Express.js with MongoDB for product, customer, order, and service management.
- Implemented product browsing, product details, shopping cart, checkout, order tracking, and mobile service features.
- Developed an admin panel for managing products, categories, product images, orders, and inventory.
- Integrated cloud-based image management and backend APIs to support dynamic product data and image uploads.
- **Website URL:** redboxmobile.app

Imayah IntelliX – Company Website | *HTML5, CSS3, JavaScript, CodeIgniter 4*

- Developed a responsive company website for a Dubai-based technology company using HTML, CSS, and JavaScript.
- Implemented responsive front-end layouts, navigation, content sections, forms, and interactive UI components.
- Developed backend functionality for form submission and data processing using CodeIgniter 4.
- **Website URL:** imayahintellix.ae

Kavin Quintal – International Motorcycle Racer Website | *React.js, Tailwind CSS 4, JavaScript*

- Developed a modern and responsive personal website for Kavin Quintal, an Indian international motorcycle racer.
- Built reusable and responsive UI components using React.js and Tailwind CSS 4.
- Created structured sections to present the racer's profile, career journey, achievements, and racing information.
- Implemented modern layouts and interactive sections with a focus on responsive design and maintainable front-end architecture.
- **Website URL:** kavinquintal.com
